Treharn Today by QWP

J. L. Treharn & Co., Inc. had been creating fine American furniture for over 30 years. We offer two distinct lines of home furnishings. The first, Treharn Classic, consists of a full line authentic reproductions of 17th and 18th century period furnishings. Each piece of Treharn Classic furniture is constructed using only solid hardwoods. The Hallmark of Treharn Classic furniture is that it is constructed utilizing time-honored construction techniques such as mortise and tenon joinery, dovetailed drawers and cases, and deep hand rubbed finishes. The Treharn Classic line is heavily influenced by the pendulum eras of furniture making. In 2006, they decided to expand their line to incorporate more modern styles, while maintaining their commitment to hand-crafting furniture utilizing quality materials and superior construction techniques. It is important to note that **Treharn Today** pieces are constructed using many of the same traditional joinery methods of Treharn Classic pieces but they elected to construct dining tables with removable bolt on legs for shipping purposes. To maintain structural integrity they utilize solid hardwoods on all structural components. They elected to use non-hardwoods on non-structural components, such as backboards and drawer bottoms. **Treharn Today** pieces can also be personalized by size, wood, detail and finish to fit into any home. If ordering items from both Classic and Treharn Today be sure to order the same options.

In January of 2017 I was told about J. L. Treharn closing their manufacturing facility of a nice collection of fine reproduction Furniture. Talking a little bit with Jerry and Sherry and Michael about the product line. QWP decided that it would be a good complementary for their existing line of products that are currently being produced.

True to its heritage, the craftsmen of J.L. Treharn & Co. have worked to the best of their ability to construct furniture of superior quality that will be passed on proudly from generation to generation. Quality Wood Products will now try to continue to construct furniture of superior quality that you came to trust from the J. L. Treharn & Co.

Treharn Today- Design Guide Important Terms:

Personalize-means the customer can actively participate in the design of their furniture. Size, design details, wood species and finish can be personalized.

Top Style- refers to board configuration of the table top. Two types are available:

Solid top-Boards are joined without visible seams or pegs. Standard on all table tops.

Planked top without Groove– hardwood pegs are used to lock boards in place. Pegs are visible. Available at an up charge.

Distress Level- refers to adding either a light, moderate or heavy amount of random dings, scratches and marks to the wood before any finish is applied. No distressing is also available. We recommend upgrading to the heritage finish (explained below) with any distressing. Choices are:

No distressing standard.

Light distressing. Available at an up charge.

Top Texture- refers to the feel of the wood. Two types are available:

Smooth- completely smooth (no texturing applied) standard.

Scraped- light texturing applied to wood. Accomplished by lightly hand scraping the wood. Can only be done with the human hand –modern tools can not replicate this look. Brings out natural wood grain. Available at an up charge.

Heritage Finish- a finish upgrade where a dark brown glaze is applied over the stain and under the top coat. The glaze darkens the stain, ages the finish and adheres to any distressed areas to accentuate them. Recommended with distressing. Two types are available:

Non-Heritage standard.

Heritage. Available at an up charge.

Rough Sawn– Lumber is used in it's natural state with very little machining. Simulates the look of reclaimed wood.

The top coat of our finish is a commercial grade, pre-catalyzed lacquer. This lacquer is heat and moisture resistant but not heat and moisture proof. Caution should be exercised with heat and moisture. Items should not be placed in direct sunlight, as sunlight will cause fading.

Quality Wood Products LLC
Handcrafters of Fine Period Furnishings
Formally Manufactured by
J. L. Treharn

Removed from the historical roots of fine cabinet making, David J Yoder (Quality Wood Products LLC) may seem like an unlikely candidate to undertake the difficult task of preserving New England antiques . Formally manufactured by J. L. Treharn .

Quality Wood Products LLC was Founded by John my dad and brother Delbert in 1996

In a small woodshop in Central Ohio, John Yoder taught his son a deep respect and admiration for the line of Arts and Crafts , Shaker , Country Furniture and Contemporary furniture line.

From my father, I started my lessons in the woodworking shop on the home place, honing my skills for nearly fourteen years . In 2003 I bought half of Dad's share and in 2008 the other half . Then in 2010 Delbert wanted to pursue his interest in agriculture field then I decided to pursue furniture-making as a full time endeavor.

In January of 2017 I was told about J. L. Treharn closing their manufacturing facility of a nice collection of fine reproduction Furniture . Talking a little bit with Jerry and Sherry and Michael about the product line . QWP decided that it would be a good complementary for there existing line of products that are currently being produced .

True to it's heritage, the craftsmen of J.L. Treharn & Co. have worked to the best of their ability to construct furniture of superior quality that will be passed on proudly from generation to generation. Quality Wood Products will now try to continue to construct furniture of the superior quality that you came to trust from the J. L. Treharn & Co.

Small Tables

NOTE: : SOME SIZES IN THIS CATALOG HAVE BEEN ROUNDED TO THE NEAREST INCH. FOR EXACT DIMENSIONS PLEASE REFER TO THE PRICE LIST.

Heirloom Quality Hutches, Buffets and Sideboards

April 1, 2023

Our North American Hardwoods

Quarter Sawn White Oak

Beautiful irregular markings or flakes are a result of logs cut in a special way, along with its amazing strength & firm texture. Quarter Sawn White Oak is a top choice. Stains well.

Cherry

A favorite and for good reasons! Cherry has many interesting characteristics. Aging to a rich reddish brown color over time & often peppered with exotic black specks and swirling grain.

Walnut

Walnut will bring extra elegance to any room. If your tastes run more toward the formal, then the rich dark browns of walnut may be the way to go. Stains well.

Birch

Light to medium blonde sapwood usually but not always contrasted against darker toned heartwood. Grain sometimes has a curl which creates an iridescent effect. Curl can also cause uneven staining. Will age to a golden color

Hard Maple

Light in color and mellows to a beautiful golden tone overtime. Occasionally flecked with naturally occurring black mineral deposits. Maple is an excellent choice for strong durable furniture. Can stain unevenly. Clear coat only, recommended.

Hickory

A very hard & durable wood by mixing the color tones the finished product is a characteristic piece of natural art.

Options

Page 55

Buffets at a glance

Page 56 - 57

Soft Maple

A little softer than hard maple but still a very durable wood. Light in color often times has a light gray, pinkish cast. Stains fair but sometimes unevenly.

Red Oak

Oak has a strong heavy look and the look isn't deceiving. When finished natural it will have a pale blonde reddish cast, which overtime will oxidize to a golden honey color. A great choice for staining.

Brown Soft Maple

Comes from the same logs as regular soft maple but is the darker heartwood. Can be a smart choice for darker staining or painting & glazing. Can stain unevenly.

Old World Collection

Standard Features of the Old World Collection

- Stylish Top Doors with 1/3 Mullions & Antique Rose Colored Glass in Top of Door
